"Joe is easy to work with and very creative. His work is professional, always on time, and just what my clients are looking for. I've worked with Joe on several projects, large and small, from PPT templates to graphics design and development for extensive flash. Although Joe takes directions well it is certainly not necessary to provide detailed instructions. He takes a concept and creates the graphics needed to express that concept expertly. Every project we've worked with has been on time and on budget. I highly recommend Joe."

Art Director at Video Professor

"I had the pleasure of working with Joe Schultz as a colleague at Video Professor for seven years. Joe managed a group of graphic artists in the Production Department at the company.

Joe's ability to produce high quality work consistently and on time made him a valuable asset to the team. He was particularly respected for his creative approach to design and his skills in bringing fresh, visually pleasing artwork to the company's line of e-learning products. Joe brought a fresh, new look to many of the lessons and proficiently managed his group during the process of implementing those changes into various products. As a result, his work won several industry design awards.

Joe is also highly adept at designing web sites. He has created sites for a variety of businesses and provided each of them with a professional and compelling online presence. The layout, navigation, and overall appearance of these sites make them easy to browse and find information.

I recommend Joe without hesitation for a position within the fields of e-learning, graphic design, and computer-based education. His ability to problem-solve, combined with his attention to detail, strong work ethic, and friendly personality would be an asset to any company."
